I learned web development from Harvard University as well. The CS50W course was and is the top rated and the best course out there with fabulous teachers such as sir Brian Yu and sir David J.Malan.

PORTFOLIO

[GitHub link ↗](#)

PROJECTS

[Website for restraunt ↗](#)
Oct 2024 - Nov 2024

I made a website for a local restaurant in Kashmir. The main language for the frontend was React.Js and the backend was Python. Auto Email responder is also integrated

[Personal Portfolio ↗](#)
Oct 2024

This is my custom portfolio developed by myself. I have used HTML, CSS, JAVASCRIPT,REACTJS,PYTHON,DJANGO for this project. Everything and every button is working and the form is synced with the backend. the "Download Resume" also works and downloads the file which is not visible in recording due to some privacy setting of Windows. A high level of CSS is used in this website and the website is optimized and made responsive and perfect for any device.

Small e-commerce website ↗

Sep 2024

This sleek and powerful e-commerce store is built to offer premium digital products, example shown of exclusive editing presets for Alight Motion and After Effects. Whether you're a content creator, designer, or video editor, you'll find everything you need to elevate your projects with ease. Our store is fully functional, from product catalog browsing to secure payment processing (Note: the payment gateway is not visible in this demo but is fully integrated). With a clean design and seamless user experience, purchasing digital products has never been easier! Customizable and Scalable: This site serves as a foundation for a complete and adaptable e-commerce solution. It's highly customizable, meaning you can scale it with features and designs tailored to your brand's needs or customer demand. From personalized designs to advanced filtering, payment integrations, and beyond—the possibilities for customization are endless.

Developed a business website for @UniversalHosiery

Dec 2021 - Jan 2022

I begun my website development career with website creation for a textile and cosmetic shop namely Universal Hosiery and its located in Lal chowk Anantnag, Kashmir. This is just 1 of my projects but also have developed others and had build my portfolio but never made it host online.

Budget Friendly Portfolio ↗

Jul 2024

This portfolio was made in a limited time with very limited budget. All the buttons you see are responsive. The backend also works and is able to deliver all the features expected from a $300 or more website. It's fully optimized and functional with no bugs. The login and logout system also works. Please note I have used my name for showcasing the website for privacy reasons.
